THEPEOPLE'S PAPER

-THE-

SALT LAKE DAILY HERALD.

The HERALD enters upon the new year with better bopes and brighter prospects than it ever before enjoyed. The remarkable success of the paper in the past, as manifested by its large in the past, as manifested by its large and steadily growing subscription list, its increasing advertising patronage and the expressions of goodwill towards the journal which greet isfrom all quarters, convinces the publishers that they are doing what they set out to do—namely, furnish a newspaper that the people would like and therefore support. The branch, as in the past, will be the positive paper. Independent in a pointest sense, it will always be tound

paper. Independent in a political sense, it will always be tound on the side of the people, out-piken on questions affecting the rights of the masses; battling for local self-government and the largest liberty to individuals consistent with public good; laboring for a pure, honest and economic administration of government; treating public matters dispassionately and employing language calculated to enlighten the reason of men, rather than influence their passions, and working for peace and the development of the resources of the territory, instead of trying to create strife velopment of the resources of the territory, instead of trying to create strife
and retard progress. With our increased facilities for gathering news,
both by telegraph and mail, the employment of a larger number of correspondents in different sections of
the country, and the better arrangement of all the many details of the
establishment, we confidently promise
to make the Salt Lake Dally
Herald a better paper than ever.

SALT LAKE

SEMI-WEEKLY HERALD

This valuable and popular edition of the HERALD will continue to make its appearance twice a week during the year, and the same degree of progress and improvement that marks he Daily will be seen in its columns. No better newspaper can be found in the west for those people who are not blessed with daily mail facilities, than the SEMI-WEEKLY HERALD. It conthe SEMI-WERKLY HERALD. It contains all the news, domestic and foreign, in a condensed and readable form. The design has been to make it combine the distinguishing characteristics of a commercial and home journal, and we believe that this has been successfully carried out. The SEMI-WERKLY has certainly met with unexpectedly high favor at the hands of the people. It is proposed to make it even more popular than in the past by reducing the price to \$3.50 per annum, making it the cheapestsemi-weekly paper in the west. The reduction in price does not imply a lessening of the does not imply a lessening of the quantity of matter published. Its columns will continue full of news and choice literature.

SALT LAKE

WEEKLY HERALD.

About the 1st of March, we will begin the publication of a Weekly Edition of the Herald States of the whole Chievagus additional: The Adams and Kearange have been sent to sea under sealed orders. Officers surnies that this is in connection with the isthmus canal project. The Adams sailed from San Francisco and the Kearange from Kay pressing during he past two or three years. The aim of the publishers will be to furnish a paper for those people who live off the main lines of travel and who off the main lines of travel and who paper for those people who live off the main lines of travel and who are not accommodated with mail serare not accommodated with mail service oftener than once a week; to provide a newspaper for those who have only one day a week of leisure to devote to the pleasant and profitable employment of reading; to supply a suitable edition of the Herald for sending abroat—a paper that shall faithfully and honestly represent this great and growing territory, with its many and important industries and its thrifty, enterprising people; to make a paper for the home circle and family fireside, one that shall contain the news, and at the same time combine the essential elements of a literary, educational and industrial journal. In fact, our aim will be to make the Werkly Herald a welcome visitor to the home, where it will be found a constant fund of instruction, entertainment and profit, to all members of the family Besides the leading characteristics of the Dally, the Weekly will contain vice oftener than once a week; to visitor to the home, where it will be found a constant fund of instruction, entertainment and profit, to all members of the family Besides the leading characteristics of the Daily, the Weekly will contain matter specially for the agriculturist, the gardener, the stock-raiser, the mechanic, the kitchen and the home-hold generally, and an important feature of its columns will be the well-chosen, entertaining and moral literature, also reports of the Tabernacle discourses. Nothing will be admitted to its columns that has not first been carefully prepared and revised. The price will be only \$2 a year, a figure unprecedentedly low for a far west newspaper. We confidently predict for the Weekly Hemand of the profession of the scoleration of the scoleration at 10 o'clock, on a special train. Half an huar later the eggine straick a cow and the train went off the track, the well-chosen, entertaining and moral literature, also reports of the Tabernacle discourses. Nothing will be admitted to its columns that has not first been carefully prepared and revised. The price will be only \$2 a year, a figure unprecedentedly low for a far west newspaper. We confidently predict for the Weekly without serious consequence. The fireman was wounded, and the train ran on an embankment ten feet high, at that moralized.

Inter-Oceanic Cenel.

Washington, 12.—Sensor Eaton has rather consequence clearly predict for the publishers shall be to make the paper merit the popularity that it cannot fail to attain.

Congress to Wrestle with the Question. Washington 13. — Senator Hill, colorado, has been authorized to sub the Senate, in behalf of the public of the pub

whatington. 12 — Senator Hill, of Colorado, has been authorized to submit to the Senate, in behalf of the public lands committee, a very interesting report which he has prepared in advocacy of the public lands to mission of aid public lands by means of arminin wells. The report begins by stating that 800,000,000 acres of land are embraced in the arid region of the United States, and that it must remain unsold for years to come, unless some means are found to supply it with water. After deducting from this aggregate the number of actualing from this aggregate the number of acres of land ascertained from government an veys and other reliable data, to be unift for agriculture, even if water were supplied to them, because of their boing for keen and mountainous, Gesilinte of 107, were with lava deposits, or coust trug of barren, drifting and, there remain, says the report, 500,000,000 acres of sands of the great plants and valleys, on a para of which valuable crops could be remain, says the report, 500,000,000 acres of sands of the great plants and valleys, on a para of which valuable crops could be remain, says the report, 500,000,000 acres of sands of the great plants and valleys, on a para of which valuable crops could be remain, and specading them over the land during the waters of rivers and treams and specading them over the land during the water with here of the copy; but owing to the limited supply of water which can be made uvailable from these sources under the most favorable conditions, probably not more than 3 per cent. Of the 500,000,000 acres can be reclaimed. What use can be made of the 485,000,000 recaning acres. They are not, it is true entirely valueless; they are now and will be beceafier used still more for pasturago land; but thoy can haver, to any great extent, be sold for this purpose; the growth of grass is so scanty that it requires from 15 to 25 acres for the support of each head of cattle, and many thousand acres are situated from 50 to 100 miles from living water and are thus unavailable

prize will not undertake the work, which is of an experimental character, as the land is all owned by the government; but let it be demonstrated that water can be supplied in this way, and citizens will purchase the land of government and wells will be bored by undividuals and corporations, and in time vast tracts of land will thereby be reclaimed.

Conling Stations Only. New York, 15.—The Heraid's Washington has the following important an nouncement: The naval expedition which has been sent down to the lay of Chiriqui has for its purpose the establishing there and on the other side of the istumus, in the Gulf of Du'ce, two coaling stations. This action has been taken by the Administration with the advice and consent of leading gentlemen in Congress, of both parties. It means nothing more than is stated above—two coaling stations at convenient points and in requently establishing. For instance, the department has now a cargo of Golf on the way to the Samoan Islands, where also a new coaling station will be established, the secretary having found it very expensive to have marel vessels depend on supplies in private hands, which are often held at exorbitant charges. The Bay of Chiriqui and the Gulf of Duices offer peculiar facilities for such stations, not only because of the safety, but because the two bays and the intervening track of land have been owned for many years, and ever since the days of Buchanan's administration, in fact, by an American citizen, who, it is understood, is willing to sell all his right to the United States. This fact made the acquisition of the real estate and water right for coaling stations there easier than at any other point equally convenient to the isthmus. It is said that negotiations are on foot for the administration by the United States of the whole Chirdina additional. The Administration and the case of the whole Chirdina additional. The Administration and the case of the whole Chirdina additional. The Administration and the case of the whole Chirdina additional. The Administration and the case of the whole Chirdina additional. rather outwitted Senator Gordon in the inter-oceanic canal matter. While Gordon was busy in the republican cloak room, soliciting support to defeat the confirmation of Simmons. Eston had quietly passed a resolution from the foreign affairs committee, calling upon the President for information relative to canal matters. It is quite probable the President will, in answer to this resolution, ransmit to both house of Congress a message on the subject. Some of the democratic are endeavoring to dissuade the President from presenting any such message, as they do not wish the Administration to have any benefit from taking the initiative in a reassertion of the Mouroe doctrine.

Salt Late Weekly Herald:

E HERALD,
Salt Lake City, Utab.

Malifex, 13.—Ceal miners at Westwille, Picton County, on a strike for the past three months, have received notice from the Drummond Colliny Company to quit their homes by Monday.

Inter State Commerce.

Washingtos, 13.—The inter-state commerce committee, to-day, adopted Representative Henderson's bill as a substitute for the Reagan bill. Henderson's bill was amended an accepted as a substitute for the Reagan bill. Henderson's before accepted as a substitute. It provides for a board of commissioners with powers and duties similar to those proposed by the McCord bill and "Charles Francia Adama" plan." One of the amendments extends the jurisdiction of commissioners ever the transportation of all property by milroad from one as more other status or territorie, or to or from any fareign country, whether such property by additional or connection with each other and washer such results of the carried on roads bying wholly within one state or mere. Another amendment, adopted on motion of Bliss, requires the commission to inquire into that method of fullroad management known as "proling" and state the result of their inquiry in their first annual report, and whether, in their judgment, acy, and if so, what legislation is expedient in relation thereto.

The Irish Relief Business. The Irish Reifel Business.

New York, 18.—The Duchess of Mariborough has cabled to Bennett for permission to distribute the Herald fund. Bennett, however, is in Africa.

The Herald relief fund, yesterday, contained the names of John McCullough, Fanny Davesport and Frank Mayo for large subscriptions; also the names of 200 congressmen, which is benieved to be sillubre are in Washington. They gave precisely \$5 coch in order to make the donation a representative one in every respect.

make the donation a representative one in every respect.

Dublin 13.—The Manadon House committee has letters giving particulars of increased distress in the country.

London, 13.—The Times says the objection of Irish members that a charge upon the church fund would really be in aid of poor rates and would thus volate the express provision of the act of 1869, is consistent with the claim made upon the imperial exchequer. The measures of government are intended only to take affect when the poor law system proves wholly inadequate whether it is to the cost of the church or state.

How Indians are Cheated.

Washington, 13 .- At the Senate in Washington, 13.—At the Senate investigation, to-day, into the removal of Cheyennas and Poners, the attention of Bright Eyes was called to a paper purporting to be signed by the heads of nearly all the Pones families, requesting the President to remove the tribe to a new reservation in Indian Territory. Bright Eyes exclaimed, "Why, White Eagle has told me a dozen times that he never signed any such paper. Why, that is morestrous." never signed any such paper. Why, that is more-trone."

Standing Bear was then shown the paper. He read it over, smiled incredulou ly and made several gastures of diaguat, accompanied by expressive 'Ughr,' and finally said, 'Thut the white man's

way. They writtone thing and tell us mother." He then explained.
